Ophthalmic Assistant Course

Level I & II

Why should you enrol in a Short Learning Programme for Ophthalmic Assistants?

- The course, Level I & II, is aimed at producing a well trained, motivated, efficient and confident role player in the care of ophthalmic patients.
- The course is designed to fill a vacuum by providing training for ancillary ophthalmic personnel.
- Level I will introduce relatively inexperienced personnel to the basic concepts of an ophthalmic practice, while Level II will enhance your prior knowledge and practical skills in taking care of an ophthalmic patient.

Programme outline

The Ophthalmic Assistant course is an approved course moderated through the *Ophthalmological Society of South Africa*, and presented as means of enhancing quality care in ophthalmic patients, as well as self development. Pretoria Eye Institute plays a crucial role in the administration of the course which includes the development and dispatching of the study material, the co-ordination and evaluation of the assignments and assessment papers.

It is a distant short learning programme with a theoretical and practical component. The theory entails notes which you will have to work through as well as a compulsory assignment to be handed in on a specific required date - with **no** postponement. The practical section of this course entails the application of your knowledge and skills. A required list of practical skills will be provided, which must be completed by the student and signed off as well as witnessed by an ophthalmologist or senior practice manager.

Applying / Registration information

Kindly apply online by following this link: www.eyeinstitute.co.za

1. After registration, you will receive an email with an acceptance letter and a invoice for the person responsible for the payment.
2. After proof of payment has been received, you will be noted as an active student and your study material will be prepared for dispatch.

Level I - Basic Course

Comprises of 9 (NINE) study units with a total of **240** recommended study hours.
